Steamboat Springs, Colorado School District adopts Canvastic for Use with Thin Client System

Lafayette, CO June 15, 2007 – Canvastic LLC announces the adoption of their flagship software product, Canvastic Version 3, by the Steamboat Springs, Colorado school district. The district is moving to a Citrix server/thin client model and tested Canvastic using the new two-month pilot program that is now available for any school, anywhere. They are planning on using Canvastic in the elementary schools.

Steve Gandy, a Canvastic LLC, principal said, “We are very pleased that we were chosen by such a progressive school district. We’ve been interested in seeing Canvastic running on thin client system for a couple of years. Cindy Walker, technology specialist for Soda Creek Elementary School saw the software demonstrated at the Colorado Technology in Education conference in June 2006 and decided to test it this spring.”
