Version 2.1 continues and expands on the concept that the software our students use to publish should be flexible, powerful, not designed as a toy, and kept current via updates! There are dozens of refinements included in this release. This is a recommended update for all users. Version 2.1 includes the following new features and bug fixes:

- Text and object shapes print much more clearly.
- Clip Art and inserted graphics now support transparency for white areas, so you won't see "white boxes" around your graphics anymore.
- Word Processing objects correctly display multiple carriage returns and spaces.
- In addition to inserting common graphic formats (jpg, png, etc.) they can now be opened directly. They are placed into a new Canvastic

document.

-Saving QuickTime movies is now done more easily, eliminating a potentially confusing step for users.

-Preference set names will now appear alphabetically regardless of network server settings that may have previously caused the list to appear in random order.

-Single pixels can now be properly filled with the Fill tool.

-Several minor interface enhancements.

We value your feedback! Please send ideas and requests to [support@canvastic.com](mailto:support@canvastic.com) and help shape the future of Canvastic.

#### OTHER NEWS:

##### A SINGLE LICENSE FOR TECHNOLOGY TEACHERS...

In other news, Canvastic LLC announces an offer for every technology teacher or technology committee chairperson everywhere. If a school employee has purchasing power for software or recommends the purchase of software for their school or district they qualify for a single license of Canvastic. To participate in this offer you must complete an on-line tour at:

<<http://www.canvastic.com/techtteacheroffer>>

##### CANVASTIC WILL BE EXHIBITING AT NETA

Canvastic will be exhibiting and presenting at the upcoming Nebraska Education Technology Association conference in Omaha, Nebraska, April 26-28. <<http://www.neta.lps.org/Conf.html>>
